

PUBLIC NOTICE
EPA Proposes Revised TMDLs for the Brush Run Watershed
Solicitation of Public Comment

The U.S. Environmental Protection Agency is noticing revised total daily maximum loads (TMDLs) for the Brush Run Watershed. **The public comment period will open October 21, 2003 and end on November 19, 2003.** The TMDLs were originally developed by the Pennsylvania Department of Environmental Protection and submitted to EPA for approval. EPA has since made revisions to the TMDLs such that wasteload allocations for nutrients and sediment are assigned to Municipal Separate Storm Sewers (MS4s), including Upper Saint Clair, Bethel Park, and Peters Township. The TMDL report is available online at: www.epa.gov/reg3wapd/tmdl. EPA welcomes input from the public regarding the re-proposed TMDLs. Please send comments by November 19, 2003 to Ms. Lenka Berlin electronically at berlin.lenka@epa.gov, or by mail at: US EPA Region III (3WP12), 1650 Arch Street, Philadelphia, PA 19103. For additional information, please contact Ms. Mary Kuo at kuo.mary@epa.gov, or (215) 814-5721.
